## Do you wish you had beautiful skin?

Everyone wants healthy, glowing and bright skin. Having a regular facial can bring out the best in your skin and provide you with an overall more youthful appearance. Facial services can be customized or traditional. Specialty facials treat specific situations and traditional facials can provide regular deep cleansing. Both types of facials improve skin properties and provide the client with a relaxing experience.

### Specialized Facials can have many benefits:

- A **Forever Young Facial** rejuvenates, smoothes, firms and tightens the skin. Additionally, it infuses the skin with vitamins and encourages cellular regeneration.
- The **Fluoroxxygen Facial** treats hyperpigmentation and photo damage while providing the additional benefit of stimulating fibroblasts and encouraging regeneration. Skin will appear lighter and brighter and melatonin production will be reduced.
- An **Herbal Peel** resurfaces skin with minimal trauma and diminishes wrinkles and fine lines. Skin texture is also improved.

All of these professional skin care solutions can be customized to achieve specific skin care needs and results. A client can expect to have an in depth skin analysis and consultation before treatments are selected.

At Metro Spa and Salon we are fortunate to have Master Esthetician and skin care specialist Francesca Spiak. Francesca has over 17 years of experience doing custom facials, waxing and make-up. In addition to keeping current on all new skin care techniques and products, Francesca also shares her expertise as a clinical instructor for estheticians in Albany. Francesca is available for personal consultations to help clients achieve amazing results.
