What is a Medi-Pedi?

A Medi-Pedi is a wellness pedicure that focuses on the continued health of the foot and nail. A client should expect to have a complete nail, skin, foot analysis and consultation before any service is performed. While anyone will benefit from this service, a typical client may have medical concerns such as diabetes. Medi-Pedis are a clinical treatment and they do not include the use of scrubs, paraffins or masks. A trained technician will be able to assess skin and nail disorders and recommend the correct treatment both in the salon and at home. The Medi-Pedi technician should only use implements that can be sterilized, such as stainless steel tools and electric foot files.

What are the benefits of a Medi-Pedi?

- Proper treatment of skin and nail conditions
- Complete lower limb evaluation
- Massage that is focused on the medical condition of client
- Use of premier foot care products
- Referral to a reputable medical professional
- Discussion and training on home care between Medi-Pedis
- Assurance that all implements are correctly used and stored

A true Medical Pedicure differs from a Medi-Pedi in that it is performed by a medical professional, foot care nurse or a technician working under the supervision of a doctor or podiatrist. A Medical Pedicure is a type of non-surgical treatment and should not be confused with a salon Medi-Pedi.

At Metro Spa and Salon, we are fortunate to have a certified Master Pedicurist, Dee Dinova, C.M.P., with over 25 years of experience - 16 of which have been focused on providing pedicures for clients with foot challenges. Dee is certified and educated by N.A.S.P. (North America School of Pedicuring). Her passion is working with diabetic clients both young and mature. She uses premier foot care products including Footlogix and Dermalogica. Dee is available for consultations and has a private treatment room at Metro Spa and Salon. She'll be happy to hear from you to schedule an appointment to begin your Medi-Pedi wellness procedure!
